

Musketeers Group Ltd's Testimonials

'The project that I have just completed with Musketeers at Bingley, West Yorkshire, is the second project between our companies, both involving the treatment of Japanese Knotweed on site. In both instances, even though totally different approaches were adopted on the two projects, I found the attitude and reliability of their personnel to be commendable both on site and in the office. Each project had its own particular challenges, but Musketeers provided the best solution based on the particular site constraints from both a commercial and practical respect. They made their promises and kept to the agreed timescales, keeping us updated throughout the process, the result being a well executed operation from concept to completion.'

Ian Stickler

Project Manager

Carillion Building

'As Environmental Manager I have always been impressed with Musketeers professionalism. The service they provide is excellent with a high degree of specialist knowledge and a skilled motivated workforce which have been a pleasure to work with.'

Toby Liberson

Environmental Manager

Interserve Project Services

'The work carried out by Musketeers at Lea Interchange was critical to the client's delivery programme. The work was complicated by the site's proximity to railway sidings, electric pylon as well as the presence of Japanese Knotweed. Musketeers were able to assist in the removal of the Japanese Knotweed at the site, by coming on board at a relatively short notice. The contract makes allowance for Musketeers to monitor the site for a further two years to ensure complete eradication of the Japanese Knotweed.'

Zack Abraham

Project Manager

Capita Symonds

'Japanese Knotweed – A Simple Solution

To deal with a problem like Japanese Knotweed I can recommend contact be made with Musketeers Group Ltd. I found them to be reliable, cost-effective and efficient. I will in future engage with them again should I have a problem site to deal with.'

Brian Hanson

Senior Engineer

For Waterman Group

'Musketeers Group Ltd provided us with an excellent service in relation to treating Japanese Knotweed at one of our sites in Sheffield. They were extremely professional, pragmatic and conscientious in their work as well as being cost effective by offering alternative solutions. I would have no hesitation using Musketeers Group Ltd for future projects.'

Greg Eley

Senior Engineer

White Young Green

'Musketeers, lead by Maxime Jay, have proved to be both professional and proactive in the way they have dealt with identified outcrops of Japanese Knotweed and Giant Hogweed at Ravenscraig on behalf of Ravenscraig Ltd, interfacing well with the Ravenscraig Development teams and I would recommend their services to other parties in similar circumstances.'
